

906 TAP-OFFS AND SPLITTERS

IF SPLITTER 6 OUT WITH DC PATH

Code : **9060100**

Model : **DI-603**

Description

6-way splitter for terrestrial and satellite TV, covering all frequencies from 5MHz to 2,400MHz. It distributes all the input signal in equal parts among the 6 outputs. It has a feed path through any of its 6 outputs to the input. The response of the outputs is flat. Also available in 2-, 3-, 4- or 8-way models.

Applications

Individual and collective installations of terrestrial and satellite TV with a star-shaped distribution. They permit power to be fed from a preamplifier or LNB through any of the outputs. In installations with multiswitches, a control voltage can be sent through their outputs.

Characteristics

Protection diodes in all the outputs. Shielded zamak chassis and metal plate. Zamak F-type connectors which form part of splitter chassis.
